

Shanvit S Shetty

Software Development Engineer (Front End)

Work Experience

IoTric | Gurugram, Haryana (1 Year)

Projects worked on :

Feb 2023 - Present

myIDFI - Mortgage based blockchain solution

- Revamped and created UI pages and components, enhancing the overall user interface.
- Conducted rigorous debugging to resolve UI issues and ensure seamless performance.
- Developed an admin panel that provided comprehensive data analysis on consumers, lenders, and applications, optimizing decision-making processes.
- Integrated a set of APIs for effortless lender profile searching and seamless addition to realtor profiles, streamlining transactions on the platform.
- Collaborated with cross-functional teams to ensure successful API integration and smooth functioning of the platform.
- Gained understanding about Decentralized Identities (DID) and Real World Asset Non-Fungible Tokens (RWANFT) for enhanced financial transactions.

Jan 2023 - Feb 2023

NexBloc - Cross-chain blockchain DNS (Domain Naming System)

- Enhanced user dashboard with real-time updates and pusher.js notifications for seamless onboarding.
- Explored Hedera Hashgraph, a secure and fast decentralized network for crypto transactions and applications.
- Leveraged Metamask, a popular Ethereum wallet and browser extension, for Ethereum interaction and blockchain solution testing.

Jun 2022 - Jan 2023

RemoteEye - AR/VR assistance platform

- Designed and developed user-friendly UI components for login, signup, password recovery, and pricing pages.
- Integrated custom APIs into the front-end application, enhancing user interactions and data management.
- Implemented advanced chat features using Mirrorfly chat SDK, including delete chat, delete for everyone, and real-time typing status indicators.
- Resolved UI issues, improving overall performance and usability.
- Integrated Pusher.js for notification services, ensuring timely updates and alerts.
- Contributed to a comprehensive platform with analytics, subscription management, video, audio, and conference calling functionalities.

Portfolio Projects

Clutchplay - Seamless NBA experience with cutting-edge PWA technology.
